SUMMARY

BCA student with a strong interest in software engineering, Artificial Intelligence, Machine Learning, Data Science, and problem-solving. Proficient in C, C++, Java, Python, JavaScript, and SQL, with a strong foundation in Object-Oriented Programming, Data Structures, Algorithms, and Database Management Systems. Experienced in developing responsive web applications and AI/ML solutions using technologies such as HTML, CSS, React.js, Git, GitHub, Firebase, Firestore, OpenCV, MediaPipe, and Scikit-learn. Built projects involving livestock management, Computer Vision, Natural Language Processing, predictive analytics, and intelligent automation to address real-world problems. Strong analytical, communication, teamwork, and research skills, with hands-on experience through internships, hackathons, technical competitions, and research activities.

EXPERIENCE

AI/ML INTERN 3SKILL

05/2026 – 07/2026

- Worked on data preprocessing, EDA, and machine learning model development using Python.
- Applied Scikit-learn, Pandas, and NumPy to build and evaluate predictive models.
- Evaluated models using accuracy, precision, recall, and confusion matrix.

AI/ML INTERN – Cognifyz Technologies

11/2024 – 01/2025

- Worked on Data Science and Machine Learning tasks involving data analysis and preprocessing.
- Applied Python and machine learning techniques to develop predictive solutions.
- Gained hands-on experience in model evaluation and data-driven problem solving.

10/05/2026 – 10/06/2026

AI Intern – DecodeLabs

- Worked on practical Artificial Intelligence tasks and project-based assignments.
- Applied Python and AI/ML concepts to develop technology-driven solutions.
- Gained hands-on experience in AI workflows, data processing, and model implementation.

PROJECTS

1.SmartCattleCare - Livestock Management System

- Technologies: Python, AI/ML, React.js, Firebase, Firestore
- Developed a livestock management platform with digital health records, Pashu Aadhaar, vaccination tracking, disease reporting, and role-based access.
- Designed a Health Intelligence Layer and Predictive Disease Risk Module for data-driven livestock health monitoring.

2.Narco Scan

- Technologies: Python, AI/ML, Computer Vision, Image Processing
- Developed an AI-powered scanning and analysis application for automated processing and intelligent analysis.
- Applied image processing and machine learning techniques to support automated analysis and reduce manual processing.

3.Fake Job Posting Detection

- Technologies: Python, Machine Learning, NLP, Pandas, Scikit-learn
- Developed an NLP-based machine learning system to identify potentially fraudulent job postings.
- Performed data preprocessing, exploratory data analysis, feature preparation, and text analysis.

SKILLS

HTML/HTML5 CSS/CSS3 Javascript
C / C++ Java Python Git / Github
Power Bi React SQL / MYSQL ML/ NLP
Gen AI OOPS DBMS

KEY ACHIEVEMENTS

- 4th Rank — Internal Smart India Hackathon (SIH) 2026
- Top 5 Team — Internal (SIH), 2025
- 2nd Rank — Community Engagement & Service, KBCNMU
- Aavishkar — Qualified Zonal Round 2025
- Best Volunteer — NSS, 2024

CERTIFICATION

- [Introduction to Data Science & Analytics – HP](#)
- [Introduction to ML Concepts – Microsoft](#)
- [Introduction to NLP Concepts – Microsoft](#)
- [Introduction to Gen AI Studio – Google Cloud x Simplilearn](#)
- [SQL & Power BI – Microsoft](#)
- [Data Analytics Job Simulation – Deloitte x Forage](#)
- [Cybersecurity Job Simulation – Mastercard x Forage](#)
- [Gen AI and Agents – Microsoft](#)
- [Gen AI Powered Data Analytics – TATA](#)

EDUCATION

Bachelor's of Computer Application
RCP Institute of Management Research and Development

2024-27 Shirpur, India

HSC
Dr. P.R.Ghogare Jr College Shirpur

2023 – 24 Shirpur, India

SSC
R.C. Patel Secondary School

2021 – 2022 Rajula, India

PASSION

Photography Trekking
Travel Creative Working
